

ZEYO 3 Smart On1Demand Home Service App

Fast " Smart " Real1Time Service Booking

The Growing Demand for Seamless Home Services

In today's fast-paced world, convenience is king. Yet, the home service industry often lags, leaving users frustrated with outdated processes. ZEYO addresses critical pain points in this essential market.

Finding Reliable Providers

Users struggle to find trusted, verified professionals amidst a fragmented market.

Lack of Real-Time Info

No immediate insight into provider availability, leading to uncertainty and long waits.

Delays & Inconsistent Pricing

Service delays and opaque pricing models cause frustration and distrust.

Disjointed Communication

Inefficient communication channels between users and service providers create friction.

Introducing ZEYO: Your On-Demand Home Service Solution

ZEYO redefines the home service experience, bringing efficiency and transparency to your fingertips. Our innovative mobile platform connects users directly with verified local professionals, ensuring quick, reliable, and convenient service every time.

ZEYO's Innovative Approach

We've engineered a dual-app ecosystem to cater to both users and service providers, ensuring a seamless, real-time experience powered by cutting-edge technology.

Intuitive Mobile Apps

Dedicated user and provider applications for optimized experiences on both ends.

Uber-like Provider Allocation

Leveraging algorithms for real-time matching with the nearest available service professional.

Live GPS Tracking

Integrated Google Maps API for transparent, real-time tracking of service providers.

Key Features: Convenience at Your Fingertips

One-Tap Booking

Effortless service requests with minimal interaction.

Real-Time Matching

Instant connection with the nearest qualified provider.

Live Tracking

Monitor service progress and provider location in real-time.

Diverse Services

From cleaning to electrical, a wide range of home services.

Secure Payments

Flexible online and offline payment options for convenience.

Verified Providers

Access to a network of thoroughly vetted professionals.

Robust System Architecture: The Backbone of ZEYO

Our robust architecture is designed for scalability, reliability, and real-time data processing, ensuring a smooth experience for all users.

This interconnected system allows for efficient communication and data flow, critical for real-time service delivery.

Real-Time Matching Workflow: Precision and Speed

Experience immediate service allocation through our highly efficient, Kafka-powered matching engine.

1

User Requests Service

A user initiates a service request via the ZEYO app.

2

Kafka Publishes Event

The request is published as an event to Apache Kafka for processing.

3

Backend Finds Provider

Our Node.js backend identifies the nearest available and qualified provider.

4

Provider Action

The provider receives and can accept or reject the service request.

5

Real-Time Updates

Status updates are sent to the user, from acceptance to job completion.

6

Live Tracking

Users can track the provider's location until the service is finished.

Visualizing ZEYO: Use Case, Data Flow, and Entity Relationships

Understanding the system's design through key diagrams.

Use Case Diagram: Outlines all possible interactions between users, providers, and the ZEYO system, detailing functionalities like service booking, acceptance, and payment processing.

DFD Level 0 (Context Diagram): Provides a high-level overview of the entire ZEYO system, showing its boundaries and major external entities interacting with it, such as Users and Service Providers.

ER Diagram (Simplified): Illustrates the relationships between key entities within the ZEYO database, including users, service providers, services, bookings, and payments, showcasing the data structure.

Conclusion: ZEYO 3 The Future of Home Services

Fast, Reliable, Real-Time

ZEYO delivers unparalleled speed and dependability in home service booking, setting a new industry standard.

Reduced Waiting Times

Our smart matching engine significantly minimizes user waiting periods, enhancing overall satisfaction.

Scalable and Robust

Designed for large-scale deployment, ZEYO's architecture supports extensive growth and service expansion.

Future Scope: Expanding ZEYO's Horizon

ZEYO is poised for continuous innovation and growth, with ambitious plans to enhance user experience and market reach.

AI-Based Pricing

Implementing intelligent pricing algorithms for dynamic and fair service costs.

Subscription Plans

Introducing flexible subscription models for regular and discounted services.

Service Diversification

Adding more specialized home services to our comprehensive offerings.

City Expansion

Broadening our service footprint to new cities, reaching a wider audience.
